

Amendments to the Specification:

Please replace the paragraph beginning on page 2, line 20 and ending on page 2, line 23 with the following amended paragraph:

In case where the ASS 1 and the INS 2 are broken down, the troubled state is informed to the CCS 3, so that the operation and maintenance function can be performed at the system level, and the CCS 3 transmits a corresponding instruction to the related ASS 1 or INS 2.

Please replace the paragraph beginning on page 4, line 16 and ending on page 4, line 22 with the following amended paragraph:

The method for identifying a calling party number according to the related art has various problems. For example, in order for the termination subscriber to identify the terminated calling party number, his or her terminal should additionally include a calling party number receiving apparatus. In addition, in case where the termination subscriber calls back with the terminated calling party number, the termination subscriber calls back with the terminated calling party number, the termination subscriber should identify the calling party number displayed on the calling party number receiving apparatus and perform a dialing operation.

Serial No. 09/837,298
Reply to Office Action of April 19, 2005

Docket No. P-0215

Please replace the paragraph beginning on page 8, line 5 and ending on page 8, line 9 with the following amended paragraph:

After receiving the predetermined number of digits, the origination processing unit 100 requests the number translation through a IPC link from a number translation unit 200 (S104), and the number translation unit 200 searches [[an]] a prefix table in a point-to-point method by using the received digits as a key and discriminates a call type (S105).

Please replace the paragraph beginning on page 9, line 20 and ending on page 9, line 25 with the following amended paragraph:

If the incoming truck processing unit 600 contains the requested calling party number, it informs the termination processing unit 300 of the corresponding calling party number (S120, S121). If the incoming truck processing unit 600 does not contain the requested calling party number, it receives the calling party number directly from [[a]] an originating station 700 and informs the termination processing unit 300 of it (S122).
